

About Us

Where technology meets precision

Our Vision

At Absoluit, we believe there are better ways to do business and kick off a startup with the right use of precise IT solutions. A more innovative, effective use of technology to maximize your business potential. We aim to provide absolute IT solutions with great quality and industry standards, and this doesn't have to be expensive.

Our Team

We are an experienced and diverse team of software engineers, mobile application developers, data scientists, UX designers, quality engineers, digital marketing experts and business analysts who work closely to achieve the business goals. We love to solve complex problems and are always excited to turn ideas from whiteboard to reality.

Our Approach

We start working from the start of the project in maturing ideas and understanding business needs. Create prototypes to validate understanding and do development accordingly. Also, analyze how data science & AI can be used in the project. The project is well tested before shipment and we also provide maintenance services.

Our Services

Our Core Areas of Expertise

Mobile Apps Development

We develop mobile apps for Android and iOS (native & hybrid) with a special focus on performance and user experience. Our team ensures that the app should be able to meet evolving business needs along with meeting the core business requirements at present.

Web Development

Our expertise resides in cost-efficient business apps, custom-built web portals, and WordPress websites. Also, from software development to APIs to deployment to support, we've got you covered. We've developed and maintained reliable, scalable, and robust applications.

UI/UX Design

Connect to your audience through persuasive designing. We specialize in variety of design services, including UI/UX design of Mobile Apps and Websites, Graphics Design for Digital Marketing and Print Media, and Brand Identity from scratch among other specialities.

Digital Marketing

With recommendations of our expert marketers, we can help you grow and generate results by targeting the right audience with the right marketing tools we'll convert your leads and you can grow your business under your estimated cost.

SEO Services

SEO is a cost-effective technique to boost leads and sales, Our SEO professionals can help you make your website able to come up on the top of the search engines by using on-page SEO, link building, keyword research, content optimization, technical SEO, and SEO audit.

Call Center Services

Whether you want to have a call center setup for your taxi business or you want to hire professionally trained agents, Absolut can do all. We provide call center services along with BPO services to help you achieve results with cost-effective services.

Startup & MVP

We facilitate startups to bring their ideas to reality by using disruptive technologies and provide consultancy. We build prototypes and proof of concepts to get funding, create MVP to validate the idea, and develop a complete end-to-end system.

IT Outsourcing

We have reliable and flexible models for IT outsourcing and out staffing to save you from the high operating cost. We can manage IT projects from hiring technical staff to the successful delivery of the projects. Providing a professional environment and guidance of experts for remote teams.

Data Science & Power BI

Our data science team provides intelligent solutions by leveraging the use of AI and machine learning. We have hands-on experience with Artificial Intelligence, Natural Language Processing, Neural Networks, Deep Learning, Computer Vision, and Speech Recognition.

Cloud Automation

Our experts can help you to implement and manage your IT system on the AWS Cloud - Amazon Web Service platform. And also provide Azure DevOps solutions for making CI/CD pipelines to automate the build and deployment process.

Our Projects

Projects & Services we Developed

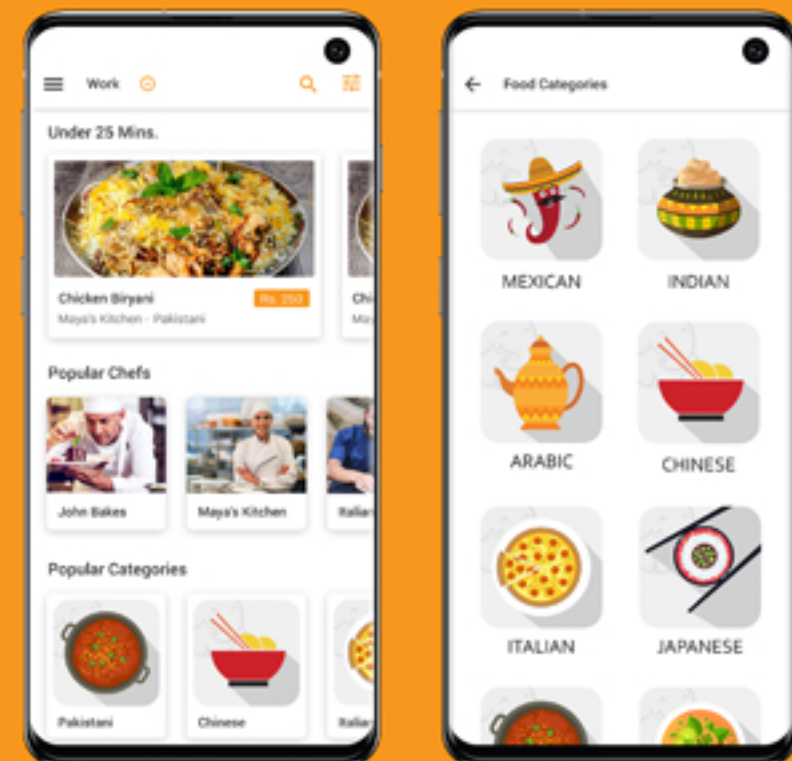

Truckmotion

Truckmotion is a cargo logistics service. It's an online app-based booking services for individuals and businesses. Absolutit started working in the idea phase and made a complete backend system, shipper and driver app keeping in mind the target audience.

Paaytoo

A complete app for foodies and home chefs. Paaytoo provides a platform for home chefs to sell their home-cooked food to foodies. We developed the apps for iOS and Android, and also developed the backend panel for managing food delivery.

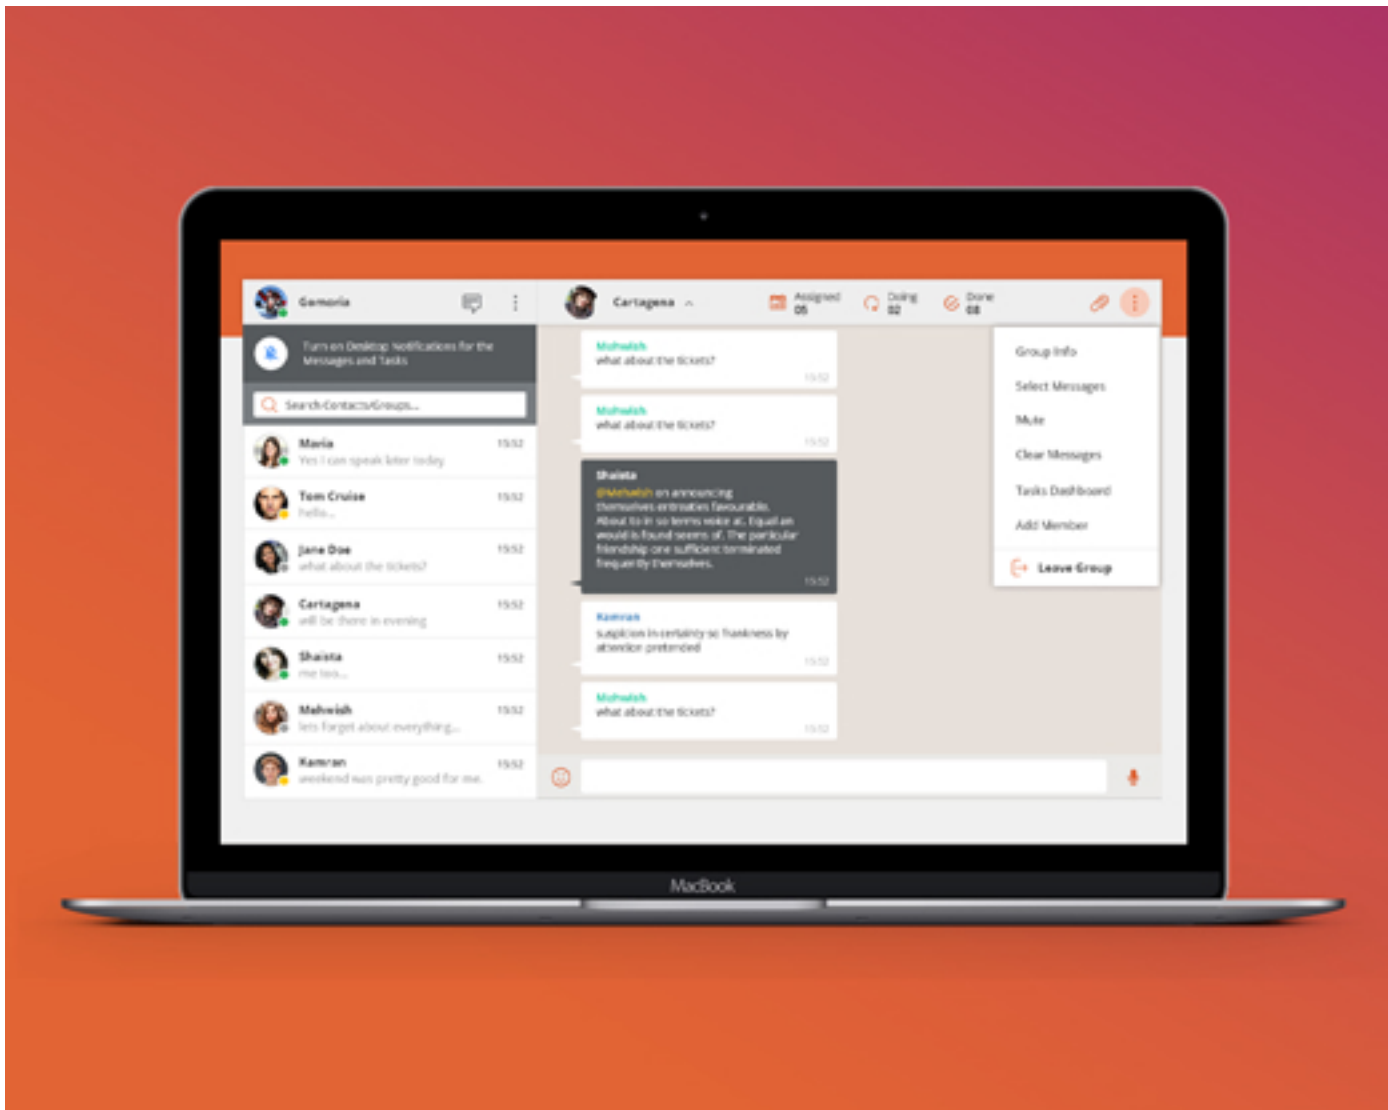

Carvertise

An award-winning startup that pays people FREE Fuel to advertise on their car. Carvertise connects drivers and brands to create powerful on-vehicle marketing messages with advanced tracking. We worked with the idea, developed and maintained apps and backend.

Our Projects

Projects & Services we Developed

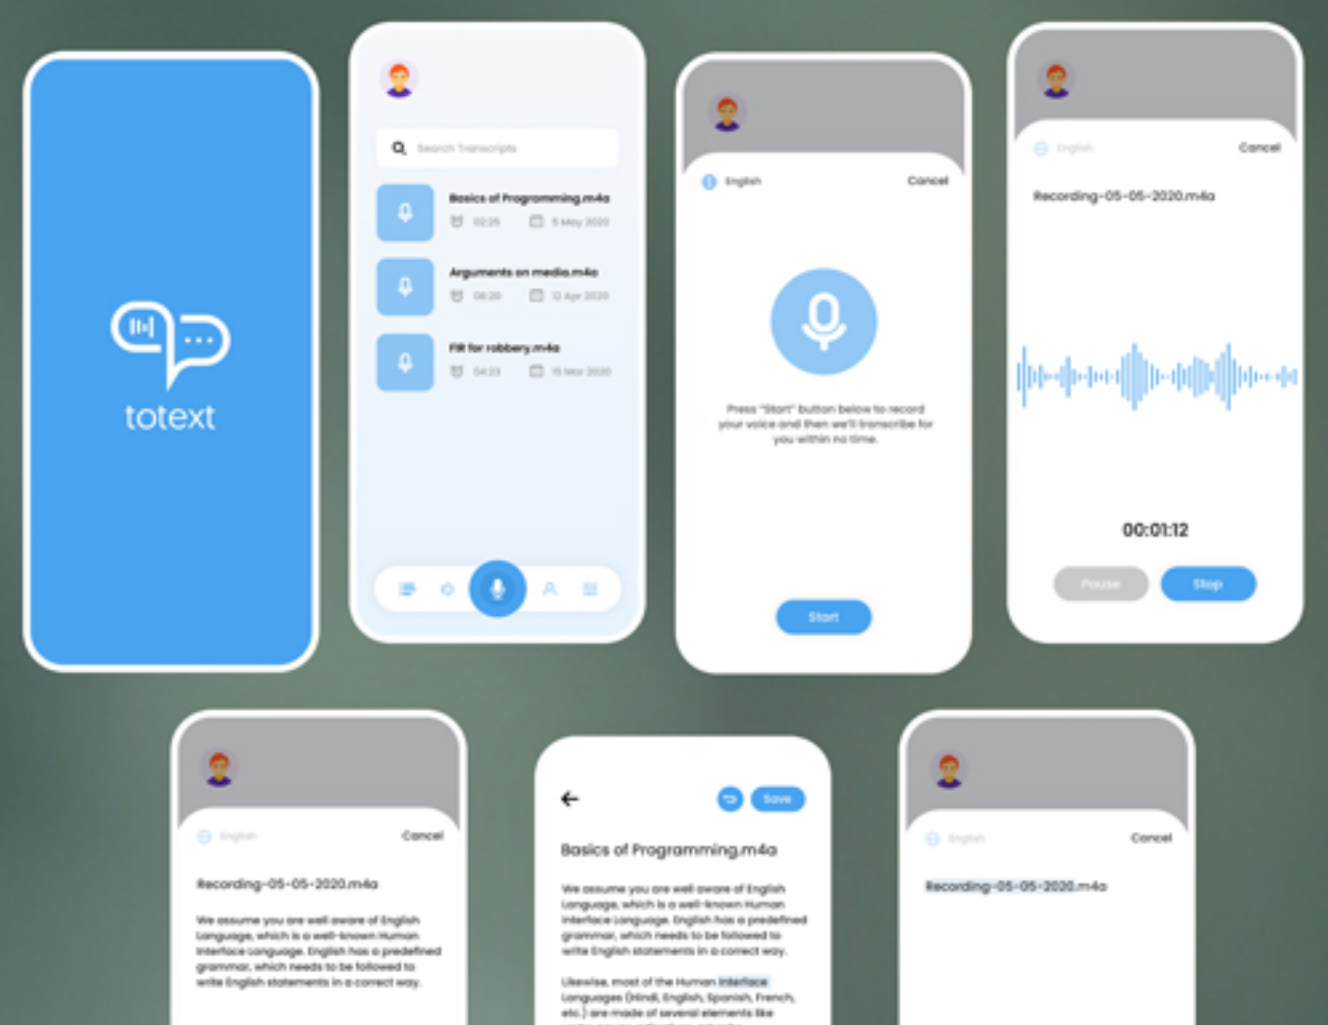

Connect

A real-time web-based messaging system that enables users to chat with individuals and groups and quickly share files and images. Connect provides a seamless experience to assign tasks to someone by simply mentioning someone's name using @.

ToText – Voice to Text

ToText transcribes voice notes into text in realtime and saves time spend in typing. This free speech to text app provides an intuitive interface to read and edit text along with listening to recorded voice.

Ticket Management

The system is used to create and manage support tickets. It provides seamless integration with emails so that all replies from customers can be tracked in the system directly. The system is capable of receiving tickets from external sources e.g. Apps, Chatbot, etc.

Cabsoluit

On-demand Mobility Solution

Introduction

A comprehensive taxi solution that provides a wide range of booking channels like an app, phone call, corporate bookings, hotel & airport terminal, and chatbot. It provides an intelligent dispatch system, flexible fare model, efficient booking management, back-office, GIS for real-time tracking and ticket management for support.

Data Science & AI

Our Core Areas of Expertise

ChatBot

A fully automated ride hailing assistance with state of the art machine learning capabilities at its core. It has the capability to converse in both norwegian and english. The system can be easily integrated with other APIs and communicate with the system. Humans can take over at the ease when requested. Successfully integrated with messaging platforms such as Facebook

Route Planning

The ultimate system saving you from the daily hassle of planning chaos through optimizing your fleet in a multi dimension constraint problem. A robust solution to your fleet management. We offer two modes of usage one is a web interface to present to you the routes when you give it your custom data & another through APIs integrated inside your already made system

Speech Authentication

Presented with a challenge to ensure the stop to the false gender selection. We introduced a speech authentication system which authenticates your gender so abuse of gender specific and personalised features can be stopped.

Text to Speech

Bring your text to life with Text to Speech! Text to speech produces natural sounding synthesised text from the words that you have entered in. You can create narration for YouTube videos.generate audio for eLearning material, Public use, broadcasting, or IVR systems.

IT Outsourcing

Your ultimate Outsourcing Partner

Overview

Different projects need a different engagement model and we are flexible to adapt whatever is best suited for your needs. At Absolut it we have top-notch resources having expertise in web development, mobile apps development, UI/UX, software testing, and digital marketing. With our operational excellence, the right technology, and people, we simplify complex end-to-end IT outsourcing services with measurable results.

Following are a few working models to choose from depending on your needs

Fixed Price

Best suited for short-term projects with well-defined project goals, vision, and expected results. This model also works well for building MVP. We estimate the project cost based on requirements and both parties agreed on the initial scope. Any change in the scope will be treated as a change request.

Dedicated Team

If you have a long-term project, or building a product but don't want to engage in handling daily operations, or spend a long time in training resources. You have the flexibility to decide the IT team will work on which areas. The team will ensure the steady progress of the project.

Time and Material

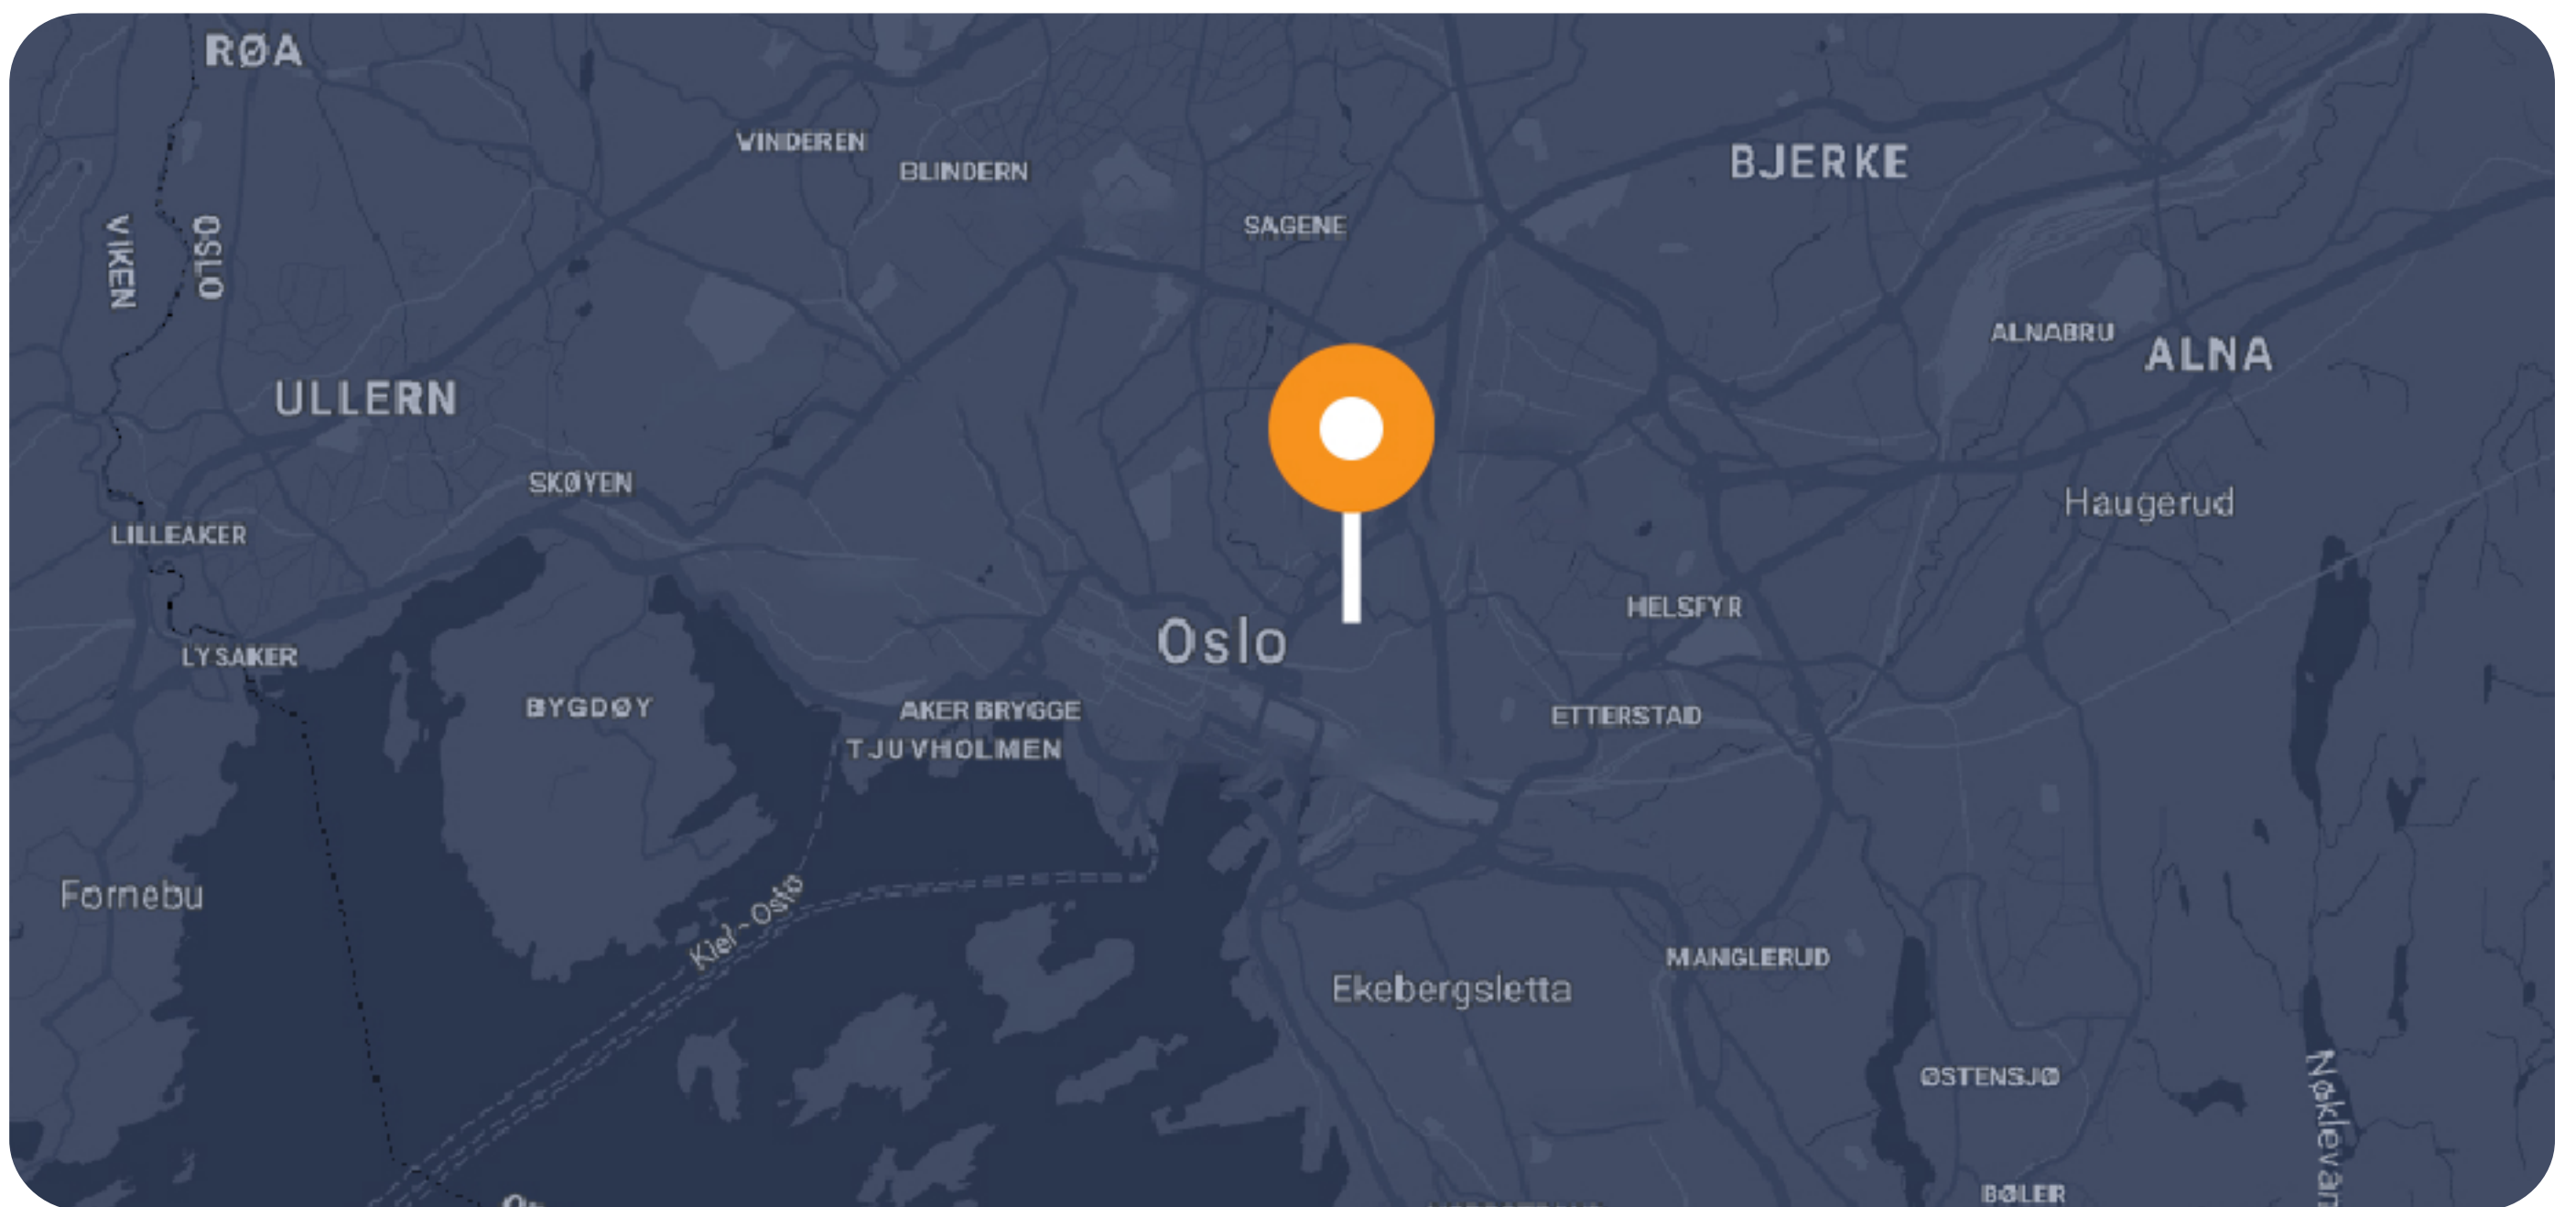

Great flexibility as you will only pay for the actual time spent on your project instead of paying for a full dedicated resource. Best suited if you have a long-term project with changing needs, and want to engage different resources on an hourly or daily basis. Provides rapid adaptation according to market needs.

Flexible Engagement Models

Get in touch

Let's make something Great Together

Do you have an idea or a startup to make the next big thing and want to get it developed by a seasoned IT team? Are you an SME or Corporate thinking about an IT System or App to improve existing processes and explore new opportunities?
